Syllabus discontinued 13 June 2008

Version 1 in Slukurs. Corresponds to version 1 in Ladok

Syllabus approved

30 November 2006

The version applies to students admitted from spring 2008 to spring 2008

The version is not a module version

Subjects

Soil science/Environmental science

Education cycle

Second cycle

Modules

Title	Code	Credits
Single module	0101	5.0

Advanced study in the main field

Grading scale

Pass / Failed

The requirements for attaining different grades are described in the course assessment criteria which are contained in a supplement to the course syllabus. Current information on assessment criteria shall be made available at the start of the course.

Language

English

Prior knowledge

Equivalent to at least 30 credits within the masters programme Soil and Water management. English skills equivalent to English A from upper secondary school.

Objectives**Objective**

The aim of the course is to develop the student's abilities in written and oral presentation adapted to different audiences. This is practiced in project work.

After completing the course, students will have:

- learned how to apply earlier knowledge to answer new questions,
- developed a better knowledge and understanding of the subject dealt with in the project,
- developed their ability to present their own results orally and in writing.

Content

Half of the time will be spent on the project while the remaining parts will focus on:

- written and oral presentation techniques
- exercises in critical reviewing and discussion-leading
- evaluating oral presentations.

Implementation

Lectures and exercises approx. 10 hours (compulsory)

Presentation and evaluation of results approx. 20 hours (compulsory)

Leading discussions of the work done by other project groups approx. 10 hours

Supervision approx. 10 hours

Individual studies approx. 85 hours

Sum approx. 135 hours

Examination**Requirements for examination**

Written and oral presentation of project work.

Approved written and oral presentation of the project work, as well as satisfactory participation in the obligatory components of the course.

- If the student fails a test, the examiner may give the student a supplementary assignment, provided this is possible and there is reason to do so.
- If the student has been granted special educational support because of a disability, the examiner has the right to offer the student an adapted test, or provide an alternative assessment.
- If changes are made to this course syllabus, or if the course is closed, SLU shall decide on transitional rules for examination of students admitted under this syllabus but who have not yet passed the course.
- For the examination of a degree project (independent project), the examiner may also allow the student to add supplemental information after the deadline. For more information on this, please refer to the regulations for education at Bachelor's and Master's level.

Additional information

- The right to take part in teaching and/or supervision only applies to the course date to which the student has been admitted and registered on.
- If there are special reasons, the student may take part in course components that require compulsory attendance at a later date. For more information on this, please refer to the regulations for education at Bachelor's and Master's level.

Responsible department

Department of Aquatic Sciences and Assessment

Cooperating departments:

Department of Soil and Environment

Department of Energy and Technology
