Advanced study in the main field

Grading scale

Pass / Failed

The requirements for attaining different grades are described in the course assessment criteria which are contained in a supplement to the course syllabus. Current information on assessment criteria shall be made available at the start of the course.

Language

Swedish

Prior knowledge

Passed examinations from the full 1st and 2nd years of the Veterinary Programme apart from the course in Population Medicine. Participation in Population Medicine of the 2nd year and all courses of the 3rd year before this, i.e. VM7150.

Objectives

After the course, the student will have obtained:

- A good anatomical/physiological basis for clinical diagnostics and treatments.
- Knowledge of the function and use of imaging techniques (radiology, ultrasound and scintigraphy).

Content

With application to the equine and canine species (feline to some extent), the following is included:

- In-depth studies on topographical anatomy and the locomotor system of companion animals, with focus on applied anatomy.
- Normal radiology and imaging techniques.
- Illustration of physiological and pathological processes by held of diagnostic examinations, e.g. radiology, ultrasound, locomotor analysis and lameness investigation.

The course period also includes components of Introduction to the Veterinary Profession and General Epizootology.

Implementation

The course includes case-based group-work, clinical/practical exercises, lectures and demonstrations.

Examination

Requirements for examination

The course examination includes practical tests and written assignments.

Passed examinations and participation in compulsory course components.

- If the student fails a test, the examiner may give the student a supplementary assignment, provided this is possible and there is reason to do so.
- If the student has been granted special educational support because of a disability, the examiner has the right to offer the student an adapted test, or provide an alternative assessment.

- If changes are made to this course syllabus, or if the course is closed, SLU shall decide on transitional rules for examination of students admitted under this syllabus but who have not yet passed the course.
- For the examination of a degree project (independent project), the examiner may also allow the student to add supplemental information after the deadline. For more information on this, please refer to the regulations for education at Bachelor's and Master's level.

Additional information

The courses General Epizootology and General Nutrition, each corresponding to 0,5 credit points, are given in association with this course. The course is integrated with VM7163 Introduction to Clinical Studies.

- The right to take part in teaching and/or supervision only applies to the course date to which the student has been admitted and registered on.
- If there are special reasons, the student may take part in course components that require compulsory attendance at a later date. For more information on this, please refer to the regulations for education at Bachelor's and Master's level.
