Syllabus approved

2009-08-26

Subjects

Animal Husbandry

Education cycle

Third cycle

Grading scale

Pass / Failed

The requirements for attaining different grades are described in the course assessment criteria which are contained in a supplement to the course syllabus. Current information on assessment criteria shall be made available at the start of the course.

Language

English

Prior knowledge

Postgraduate student in Animal Science

Objective, including learning outcomes

The purpose of this course is to read and critically evaluate scientific papers of high quality, and to broaden the participants knowledge within the area of Animal Nutrition and Management.

Content

The course is in the form of a "journal club". Before each meeting, one selected paper should be read and will then be discussed during the two hours meeting. At each session, one of the participants will act as a "moderator" presenting the paper and leading the discussion. All participants shall however do their best to critically read and discuss the paper. Everyone shall act as moderator on one occasion. The selected papers shall be of general interest and not in a very narrow research area. Senior researchers will support the discussion.

The papers shall be dealing with matters within the subject Animal Nutrition and Management, including nutrition and feeding, management and housing, feed science etc. All aspects of the discipline may be discussed in the selected papers. Also methodology of general interest may be discussed.

Requirements for examination

Attendance to at least 7 occasions and presentation of one paper and moderating the following discussion.

Additional information

Dates and times will be set in agreement with the participants.

Responsible department

Department of Animal Nutrition and Management
