SLUkurs

Syllabus

PNS0118 Animal foods, lipids and health, 5.0 credits

Syllabus approved

2014-11-13

Subjects

Food Science

Education cycle

Third cycle

Grading scale

Pass / Failed

The requirements for attaining different grades are described in the course assessment criteria which are contained in a supplement to the course syllabus. Current information on assessment criteria shall be made available at the start of the course.

Language

English

Prior knowledge

Master level in biology, food science, animal science, nutrition, veterinary medicine and medicine

Objective, including learning outcomes

to understand underlying mechanisms in nutrition, nutrigenomics and metabolomics in animal models, human health

Content

Basic lipid knowledge, nutrigenomics, human health , animal origin foods and their impact on health
metabolomics

Requirements for examination

written project based on own research activities in relation to the objectives of the course

Additional information

Responsible department

Department of Molecular Sciences
