

## Syllabus

### **BI0061.1 Anatomy of Domesticated Animals - Basic Course, 3.0 credits**

#### **Husdjurens anatomi - grundkurs**

The course is given as course independent of study programme

Syllabus discontinued 4 June 2007

Version 1 in Slukurs. Corresponds to version 1 in Ladok

#### **Syllabus approved**

8 April 1992

The version applies to students admitted from spring 1999 to spring 2006

The version is not a module version

#### **Subjects**

Biology

#### **Education cycle**

First cycle

#### **Modules**

<b>Title</b>	<b>Code</b>	<b>Credits</b>
Single module	0101	3.0

#### **Advanced study in the main field**

#### **Grading scale**

Pass / Failed

The requirements for attaining different grades are described in the course assessment criteria which are contained in a supplement to the course syllabus. Current information on assessment criteria shall be made available at the start of the course.

**Language**

Swedish

**Prior knowledge**

Biology (B) from Upper Secondary School.

**Objectives**

After the course, the students will:

- Have knowledge of the anatomy of the animal body.
- Have knowledge of the different body systems of the animal body (also see Course Content).
- Be able to describe the anatomical characteristics of the animal species included in the course.
- Be able to carry out dissections with tutor assistance.

**Content**

The course includes the following components: Respiratory, circulatory, digestive, urinary, reproductive and endocrine organs, skeletal anatomy and an overview of the locomotion system.

The course includes the following animal species: Ruminants, pig, horse and carnivores.

The teaching methods are lectures and demonstrations on the above-mentioned organ systems. A considerable part of the course is practical work with animal material, i.e. dissections.

**Implementation**

Lectures ca 20 h

Demonstrations ca 10 h

Dissections and practicals ca 25 h

**Examination****Requirements for examination**

An examination is arranged at the end of the course.

Passed examination and participation in dissections.

- If the student fails a test, the examiner may give the student a supplementary assignment, provided this is possible and there is reason to do so.
- If the student has been granted special educational support because of a disability, the examiner has the right to offer the student an adapted test, or provide an alternative assessment.
- If changes are made to this course syllabus, or if the course is closed, SLU shall decide on transitional rules for examination of students admitted under this syllabus but who have not yet passed the course.
- For the examination of a degree project (independent project), the examiner may also allow the student to add supplemental information after the deadline. For more information on this, please refer to the regulations for education at Bachelor's and Master's level.

### **Additional information**

- The right to take part in teaching and/or supervision only applies to the course date to which the student has been admitted and registered on.
- If there are special reasons, the student may take part in course components that require compulsory attendance at a later date. For more information on this, please refer to the regulations for education at Bachelor's and Master's level.

### **Responsible department**

Department of Anatomy, Physiology and Biochemistry

### **Supplementary Information**

*Finalized by:* Fakultetsnämnden, V-fak

*Biology Area:* Other Biology Courses
