**PFS0014 Valuation of environmental resources: Part I, 7.5 credits**

## Syllabus approved

2005-09-28

## Subjects

Economy

## Education cycle

Third cycle

## Grading scale

Pass / Failed

The requirements for attaining different grades are described in the course assessment criteria which are contained in a supplement to the course syllabus. Current information on assessment criteria shall be made available at the start of the course.

## Language

English

## Prior knowledge

Basic knowledge of mathematics and microeconomics

## Objective, including learning outcomes

The main purpose of the course is to give an overview of valuation methods, how they are used and how they can be used.

**Content**

This course provides an introduction to the art and science of valuing non-priced goods, primarily those that are connected to environment and natural resources. The course will cover direct and indirect methods. The second part of the course (Spring2006), we will cover direct methods in more detail.

**Requirements for examination**

Written exam and/or assignment

**Additional information**

The course meets twice a week.

**Responsible department**

Department of Forest Economics
