Advanced study in the main field

Grading scale

Pass / Failed

The requirements for attaining different grades are described in the course assessment criteria which are contained in a supplement to the course syllabus. Current information on assessment criteria shall be made available at the start of the course.

Language

Swedish

Prior knowledge

3 credits basic algebra and 3 credits calculus of one variable, or equivalent.

Objectives

To give

- fundamental knowledge and skills in programming and software development
- fundamental knowledge in algorithms and problem solving
- basic knowledge on computers and computer systems

Content

Programming in C: datatypes, variables, assignments, selection, iteration. Input/output (I/O). Functions, arrays and pointers. Records, dynamic memory, linked structures. Programming style. Programming methodology: specification, analysis, design and testing.

Implementation

The course consists of 30 hours of lectures, seminars and computer exercises. An important part of the accomplishment of the course is the mandatory assignments.

Examination

Requirements for examination

Written test and assignments.

Passed test and passed assignments.

- If the student fails a test, the examiner may give the student a supplementary assignment, provided this is possible and there is reason to do so.
- If the student has been granted special educational support because of a disability, the examiner has the right to offer the student an adapted test, or provide an alternative assessment.

- If changes are made to this course syllabus, or if the course is closed, SLU shall decide on transitional rules for examination of students admitted under this syllabus but who have not yet passed the course.
- For the examination of a degree project (independent project), the examiner may also allow the student to add supplemental information after the deadline. For more information on this, please refer to the regulations for education at Bachelor's and Master's level.

Additional information

Some computer experience is expected.

- The right to take part in teaching and/or supervision only applies to the course date to which the student has been admitted and registered on.
- If there are special reasons, the student may take part in course components that require compulsory attendance at a later date. For more information on this, please refer to the regulations for education at Bachelor's and Master's level.

Responsible department

Department of Energy and Technology

Supplementary Information

Finalized by: Programnämnden för biosystemteknikprogrammet
